

### **About PZEM**

PZEM focuses on Asset Optimization & Trading, Analytics and supplying energy products and services to the business market.

On the asset side, the Sloe and Rijnmond gas fired power plants make an active contribution to balancing the Dutch electricity grid. By combining the strategical optimization of our assets with the long- and short term trading capabilities, we actively manage PZEM's exposures in the north west energy gas and power markets. Due to the significant further increase in installed capacity of solar and wind, market dynamics experience an ever growing requirement for flexibility. PZEM respond to this need for flexibility by pro-actively modelling and adjusting the Asset / PPA / Customer / Imbalance portfolios.

In 2023, PZEM strengthened their position by becoming part of the EPH group, with EP Netherlands as new shareholder and owner. Resulting in a mix of over 100 years of energy experience combined with the strength and innovation to further color our joint ambitions.

We are looking for a

### **Financial analyst (Full time)**
